STYLE

FeTerra™ SELECT

Tempered glass is paired with intricate hand-forged wrought iron scrollwork designs welded to a durable 14 gauge steel frame. Seven elegant patterns and several glass options are offered, allowing light to pass through with varying degrees of privacy. The doors are treated with an industrial powder coated finish, consisting of a baked-on epoxy zinc primer basecoat to protect against rust, followed by a textured decorative top coat in charcoal. This process ensures a beautiful and durable low-maintenance finish.

FeTerra™ COLLECTION

Three unique designs crafted from hand-cast aluminum scrollwork mounted on an aluminum or polycarbonate panel. The frame and panels are constructed from durable corrosion-free aluminum and are available in a factory finish powder coat rust color.

FeTerra™ ACCENTS

Decorative aluminum scrollwork in three styles designed exclusively to accessorize Clopay Custom Reserve® Collection wood carriage house style doors.

AVAILABLE: SUMMER, 2009
